Career Objective

AI & ML student at Anurag Engineering College with skills in Python, Java, JavaScript, HTML, CSS. Interested in building intelligent systems and seeking internship opportunities to apply machine learning and software development skills in real-world projects.

Education

B.Tech 3rd Year –ANURAG ENGINEERING COLLEGE CSE (AI&ML) **CGPA: 9.52/10**

Intermediate-GOWTHAMI JUNIOR COLLEGE (MPC) **MARKS: 979/1000**

SSC-GOWTHAM SCHOOL **GPA: 9.5/10**

Technical Skills

Programming Languages: Python, Java

Web Technologies: HTML, CSS, JavaScript

Tools: Git, GitHub, VS Code

Core Concepts: Data Structures

Projects

[1]Reference Book Search Engine

Developed a web application that helps users search and find reference books quickly.

Implemented search functionality to display books based on concept or keywords.

Designed a simple and user-friendly interface for easy navigation.

Technologies: HTML, CSS, JavaScript, React.js

GitHub Repository Link: https://github.com/PavaniReddy-26/Reference_Book_Finder

Live Demo: <https://pavanireddy-e29586.netlify.app/>

[2]AI Space Explorer Agent

Developed an AI-based agent that answers space-related queries.

Integrated NASA APIs to fetch daily space images and Mars rover photos.

Provides images, explanations, and space facts based on user input.

Technologies: Python, HTML, CSS, JavaScript, govt space API.

GitHub Repository Link: https://github.com/PavaniReddy-26/space_explorer

Live Demo: <https://space-explorer-ebvd.onrender.com/>

[3]Trinity

TRINITY is a bilingual (Telugu/English) rural intelligence web platform built for Telangana farmers. It has 3 modules namely krishi(Agri), Arogya(Health), Schemes. It features AI-powered crop disease detection using Claude Vision API, crop advice, sowing calendar, profit predictor, symptoms checker, mother and child-pregnancy tracker, child nutrition, vaccines, ICDS schemes, Medicine reminder, government scheme discovery, and a farmer dashboard — all in a single friendly web application.

Technologies: HTML, CSS, JavaScript, API's.

GitHub Repository Link: <https://github.com/PavaniReddy-26/Trinity>

Live Demo: <https://pavanireddy-c7e1ed.netlify.app/>

[4]Medical Report Analysis

Medical reports often contain complex medical terms and numerical values that are difficult for patients to understand. MedSense AI solve this problem by automatically analyzing medical reports and providing simple explanations. The system extracts text from reports using OCR and processes the data using Flask to help users easily understand their health information.

Technologies: HTML, CSS, JavaScript, OCR.

GitHub Repository Link: https://github.com/PavaniReddy-26/Medical_Report_Simulator

[5]Personal portfolio

Developed my personal portfolio website to showcase my skills, projects, and achievements. Built a responsive and visually appealing interface using HTML, CSS, JavaScript, and Tailwind CSS. Integrated project demo links and contact features, and deployed the website on Netlify.

Technologies: HTML,CSS,JavaScript.

GitHub Repository Link: https://github.com/PavaniReddy-26/HorizonTechX_Personal-Portfolio

Live Demo: https://pavanireddy-26.github.io/HorizonTechX_Personal-Portfolio/

[6]Calculator Web Application

Developed a responsive calculator web application using HTML, CSS, and JavaScript with support for basic arithmetic operations. Implemented an interactive user interface with a display screen, functional buttons, clear/reset option, real-time calculations, and keyboard input support to enhance user experience.

Technologies: HTML,CSS,JavaScript.

GitHub Repository Link: https://github.com/PavaniReddy-26/HorizonTechX_Simple-Calculator

Live Demo: https://pavanireddy-26.github.io/HorizonTechX_Simple-Calculator/

[7]JavaScript Music Player

Built an interactive music player application using HTML, CSS, and JavaScript featuring audio playback controls such as play, pause, next, and previous. Added song information display, progress tracking, duration display, volume controls, and a responsive user-friendly interface.

Technologies: HTML,CSS,JavaScript.

GitHub Repository Link: https://github.com/PavaniReddy-26/HorizonTechX_Music-Player

Live Demo: https://pavanireddy-26.github.io/HorizonTechX_Music-Player/

[8]Quiz App

Mini Interactive Quiz App built using JavaScript DOM Manipulation. This project features multiple-choice questions, real-time answer checking, score calculation, and a user-friendly interface. It demonstrates dynamic content updates, event handling, and DOM manipulation using HTML, CSS, and JavaScript.

Technologies: HTML, CSS, JavaScript.

GitHub Repository Link: https://github.com/PavaniReddy-26/InternSpark_Quiz-app

Live Demo: https://pavanireddy-26.github.io/InternSpark_Quiz-app/

[9]Recipe Finder

Global Flavors – World Recipe Explorer is a premium recipe discovery platform built using **HTML, CSS, and JavaScript**. The application enables users to explore international cuisines and recipes through a clean, modern, and fully responsive interface. The platform features an immersive hero section, advanced recipe search functionality, country-based cuisine exploration, favorites management, recently viewed recipes tracking, dark/light theme switching, and detailed recipe viewing through interactive modal windows. Users can filter recipes by category, country, meal type, and alphabetical order, making recipe discovery fast and convenient.

GitHub Repository Link: https://github.com/PavaniReddy-26/InternSpark_Recipe-Finder

Live Demo: https://pavanireddy-26.github.io/InternSpark_Recipe-Finder/

[10]Portfolio

Designed and developed a responsive personal portfolio website to showcase projects, technical skills, education, and contact information. Built using HTML, CSS, and JavaScript with a modern user interface, smooth navigation, project showcase section, downloadable resume, and direct links to live demos and GitHub repositories. The website is optimized for desktop and mobile devices, providing an engaging user experience and professional online presence.
